GOLD CORP

# Snowline Gold Corp

Exploring District-Scale Gold Systems in the Selwyn Basin

## Company Overview

Snowline Gold is a Yukon based explorer with one of the Territory's largest mineral portfolios, covering over 90,000 hectares across 7 projects.

Snowline Gold is backed by well-known industry leaders; Paul Matysek, Dr. Craig Hart and Quinton Hennigh as technical advisors, and Keith Neumeyer, and Eric Sprott as key shareholders.

## Investment Highlights

### Going big:

Focused on district-scale, greenfield gold discoveries with the goal of finding world-class (>5Moz) gold deposits

### Exploration program underway:

- » 3,000m drill program at Einarson and Rogue to test high-grade gold targets, up to 152 g/t Au from historical surface sampling
- » Discovery-stage drilling designed to follow up multiple zones of high-grade gold found on surface, up to 34 g/t Au at Einarson & up to 152 g/t Au at Rogue
- » \$20M in prior work has generated geological models and high-priority, untested high-grade gold drill targets

### Consolidated district:

Snowline Gold controls 72,000ha across the prolific yet underexplored Selwyn Basin, and 2 additional projects west of the Tintina Fault take Snowline's portfolio to 90,000 hectares all together

## The Opportunity: Einarson & Rogue

- Snowline's two district-scale gold projects are at the intersection of established mineral belts
- Defined gold targets with high grades and potential for world-class scale
- \$20M+ spent by previous operator on regional exploration affords rapid, low-cost entry
- "Elephant country" in the Selwyn Basin, an under-explored geological analogue to Nevada's Great Basin

## Management & Directors

<b>Nikolas Matysek</b>	CEO, Director, Co-Founder
<b>Scott Berdahl</b>	COO, Director, Co-Founder
<b>Natasha Tsai</b>	CFO
<b>Craig Hart</b>	Independent Chairman
<b>Sarah Weber</b>	Independent Director
<b>Gunther Roehlig</b>	Non-Executive Director

## Advisors

<b>Paul Matysek</b>	Technical Advisor
<b>Quinton Hennigh</b>	Technical Advisor
<b>Ron Berdahl</b>	Technical Advisor, Co-Founder

## Einarson Gold District

- 72,000ha land package staked following extensive detailed regional assessment
- Total greenfield: Zero gold-focused exploration prior to 2010 in a Luxembourg-sized region
- Only two full field seasons of exploration at Einarson, less than a full year of intensive field exploration to date
- Extensive geochemical baseline comprising 25,000 soil & 4,500 silt samples

- Broadening structural zone at East end of Rackla belt, with potential to host multiple gold trends
- Flexure zone accommodates Dawson & Kathleen faults along deep-seated structures and creates fluid traps in favourable geology
- Large gold & Carlin pathfinder anomalies within domal uplifts
- Orogenic gold mineralization to 34.2 g/t Au along km-scale trends
- Controlling 70% interest (former optionee Anthill Resources at 30%), exploring 100% reconsolidation

## Rogue Gold District

- Multiple new discoveries and anomalies identified in mid-Cretaceous plutonic complex of the Tombstone gold belt
- Distinctive setting similar to Dublin Gulch (Victoria Gold, producing), Pogo (Northern Star, producing), Fort Knox (Kinross, producing), and Brewery Creek (Golden Predator, in development)
- 11,227ha land position within extensive baseline dataset covering entire plutonic complex (>100,000ha)
- Surface grab samples with visible gold have assayed up to 152 g/t Au and – distal to the visible gold and other known showings – a single soil line yielded a gold-in-soil value of 4.6 g/t Au
- Contour soil sampling, prospecting and geological mapping will be performed across the greater Valley-Gracie trend, and on secondary claim blocks, to assess for additional targets

## 2021 Exploration

Aggressive, fully funded field campaign, including first pass drilling with permits in hand will unlock the value of Snowline's portfolio

- **Einarson**
  - » Targeting through detailed mapping, prospecting, Geochem, & geophysics
  - » Initial 600m Phase I drilling at Mars NE
  - » Proposed results-driven 5,000m Phase II program
- **Rogue**
  - » Surface Geochem and structural mapping to complement geophysics
  - » Initial 600m Phase I Valley zone drilling
  - » Proposed results-driven +3,000m Phase II program
- **Other Projects**
  - » ~\$800k in planned exploration expenditures in assessments and advancements to drill-ready stage
  - » Potential first-pass drilling where warranted
